• <https://github.com/nickkostov>

Summary

Dedicated DevOps engineer with nearly 5 years of experience in designing, implementing, and optimizing CI/CD pipelines, infrastructure automation, and cloud environments. Proficient in tools like Docker, Circle CI, BASH scripting, and AWS, adept at streamlining development workflows to enhance efficiency, reliability, and scalability. Proven ability to collaborate cross-functionally to drive continuous improvement and deliver high-quality software solutions.

Quote:

"Don't worry I am not scared of anything new. There is always documentation."

CERTIFICATIONS & SKILLS

Terraform Associate • Amazon Web Services Cloud Practitioner • Linux Professional Institute Essentials • DPN Technical Specialist • DPN Support Specialist • Circle CI Associate Developer

Strengths

 Communication Open-minded and patient in conversations with others.	 Task Decomposition Worked on developing Python CLI for management of DataDog Platform using its API. Identified what is needed and created all necessary subtasks.	 Management Managed a small group of newly hired Junior and Senior DevOps Engineers. Was able to identify appropriate tasks based on skill level and assisted them in completing them for a period of 5 to 10 months.
 Scripting and Terraform Developed reusable Terraform modules for AWS, improving infrastructure management efficiency.	 Flexibility/Organisational skills Managed to finish over 3 full-scale courses while working full-time to earn my Linux, Terraform and AWS certifications.
